

No Wifi

1. Check to see if you are on your account.
 1. Click on the Windows Start Menu.
 2. Click on the account icon.
 3. Check - Does it say **LaptopLoan**? If so, log out and log in with you account.
2. Check your internet connection.
 1. Press the **Windows** and **I** keys at the same time to open settings.
 2. Search for Wifi in the search bar and clicl the top result.
 3. Have a connection? If not, click '**Show available networks**' and connect to **LHS-District**.
 4. Network say '**Connected, No Internet**'? Try toggling the wifi setting off and back on again. If this doesn't work after a few attempts, it could be your laptop.
3. Restart your laptop.
 1. Save all of your work. Restarting will delete any unsaved documents or data.
 2. **Do Not** press the power button on your laptop, as this can damage it if used incorrectly. Instead, press the Windows Start Menu, press the power button, and click restart.
 3. It will restart on its own, so wait until it is done. Log into your account and try to connect to wifi again.
